STAR REPORTER PAULINE PERIL HITS NEW HEIGHTS ON DAREDEVIL STORY

BIG POSTER ISSUE

Walt Disney Presents THE SLEEPING BEAUTY, the story of Princess Aurora who falls under the spell of the Evil Fairy. It's one of the most enchanting stories of all-time, and you will fall under the spell of this Walt Disney issue with its beautiful pull-out poster.

THE YOUTH TRAP

Two engineers from the Star Ship Enterprise have been reduced to five-year-olds, and with them is a teen-ager, Dr. McCoy! And now, little by little, Captain Kirk and Mr. Spock are getting younger . . . and younger . . . in next month's STAR TREK.

BIG CHIEF TUBBY

He's all set for a scalping party as he lures Lulu and her friends into an ambush. The ladies have ideas of their own, though, and Tubby is in danger of losing his feathers. It's more fun with LITTLE LULU AND TUBBY IN SUMMER CAMP.

A GHOSTLY TREAT

That's what you will find in the new RIPLEY'S BELIEVE IT OR NOT! — **True Ghost Stories.** You're in for a rattling good time!

VILLAIN HOPES SHE'LL FALL DOWN ON JOB

Pauline Peril, ace reporter on her Daddy's paper, The Daily Noose, puts her neck out covering the fantastic feats of stuntman Scareless Harry. Where Scareless goes, Pauline follows, which is fine with editor Snodgrass McViper who stands to inherit the newspaper with Pauline out of the way. Give her enough rope, sneers McViper, and The Daily Noose will be his. Read all about THE CLOSE SHAVES OF PAULINE PERIL next month.

SMOKEY IS MOOSETAKEN

Smokey plays Cupid to lovelorn Myron Moose who keeps hanging around Miss Beaver who naturally is moost upset. Everything turns out happily for Myron and Miss Beaver, but not the way Smokey had planned. There's a forest full of chuckles in the next issue of SMOKEY BEAR.

AS A CHEMIST

A fascinating limitless future awaits you if you choose to be a chemist. The world and everything in it, including the earth, itself, is of interest to these men of science. Chemists usually work in laboratories, experimenting and testing to determine the physical properties of natural substances. They also test reactions of substances to each other, all in an attempt to improve our world products. To be a chemist, you must be interested in physics and chemistry and be able to solve complex algebra equations. You must also be a careful and painstaking worker in order to perform exacting chemical operations in the laboratory and to devise detailed methods for new experiments. Being able to sense fine differences in colors and odors is also very important. To obtain a bachelor's degree in chemistry, a full-time four-year college course is required. There are many branches of chemistry, including: organic chemists, who deal with living matter, such as wood; inorganic chemists, who deal with minerals, metals, etc.; analytical chemists, who make precise measurements of the quality and quantity of chemical elements; biochemists who study the chemical actions occurring in plants and animals. Within these branches, there are many subdivisions, such as teaching, developing new products, industrial use of chemical products, controlling material and production, etc. The graduate chemist can follow many paths with starting salaries of about $7000 a year.

AS AN AIRLINE STEWARDESS

You will find the whole world at your feet if you choose to be an airline stewardess! A life filled with excitement, world travel, and interesting adventures will be yours! An airline stewardess must be a high school graduate, at least nineteen and one-half years old, and five feet and two inches to five feet and ten inches tall. She must enroll in the airline's training course for six weeks, during which time she will be taught her duties, including how to maintain good relationships with passengers and what to do in emergencies. Her first flights will be supervised by experienced head stewardesses. The stewardess boards the plane about forty-five minutes before take-off and makes sure that the cabin and galley are in order. She must supervise the food and beverage storage. When the passengers board the plane, she greets them, directs them to their seats, and checks the passenger list. She helps the passengers with their coats and hats and makes certain that all seat belts are fastened. She demonstrates the use of oxygen masks, in case of an emergency. During the flight, the stewardess serves food and beverages and generally sees to the welfare of the passengers. Should a passenger become ill, she can help with minor care and medication. At the end of the flight, she must file a flight report. The duties of a stewardess are strenuous, but it is ideal work for those who love to travel. Salaries start at about $420 a month, with excellent opportunity for advancement.

Summer Fun is published and distributed by the Periodical Division of Western Publishing Co., Inc., 850 Third Avenue, New York, New York 10022 and in Canada by Whitman Publishing/Golden Press of Canada, Ltd.
